

# Strategy for Climate Change

## The Mitsubishi Electric Group's Materiality

With the vision of realizing a vibrant and sustainable society, the Mitsubishi Electric Group has established its "materiality" (significant issues) by grouping sustainability initiatives that have particular priority from the two perspectives of "providing solutions to social challenges through our business" and "strengthening our business foundation to enable our sustainable growth." Based on this, we have re-established five new issues and have begun addressing them from fiscal 2022. One of these is "the realization of a sustainable global environment." We have made our response to climate change a priority in this area and our aim is to achieve net-zero greenhouse gas emission throughout the value chain in 2050.

The Mitsubishi Electric Group's Materiality / Contribute to the SDGs

## Initiatives to Realize a Decarbonized Society Updated in Nov. 2021

The Mitsubishi Electric Group is aiming to achieve net-zero greenhouse gas emissions throughout the entire value chain by 2050. Toward this end, we are striving to reduce greenhouse gas emissions with a focus on the following four initiatives: (1) increased contribution to reducing the CO<sub>2</sub> emission factor of electric power, (2) reduction of emissions by products, (3) reduction of emissions in production, and (4) improvement of efficiency and spread of power semiconductor devices, etc.
