Japan MOE Guideline

Item to Be Reported	Reference Page (s)	Contents
1. Basic information of environmental reporting		
Basic requirements for environmental reporting		
Boundary of the reporting entity	P.1	About This Report
Reporting period for information provided	P.1	About This Report
Reporting standards, guidelines or the like	P.1	About This Report
Overview of the environmental report	_	_
2. Trends in key performance indicators		
Trends in major performance indicators	P.34-37	Environmental Data
2. Items to be reported in environmental reporting		
Top management's commitments		
Top management's commitments on the entity's response to material		_
environmental issues '	_	
2. Governance		
The entity's governance structure	P.10	Management System
Name of the manager responsible for material environmental issues	P.10	Management System
The roles of the board of directors and the board of executive officers in	P.10	Management System
the management of material environmental issues	F.10	Management System
3. Stakeholder engagement		
Corporate policies to stakeholders	_	
Overview of stakeholder engagement activities conducted in the		_
reporting period	_	_
4. Risk management		
Environment-related risk identification, assessment, and management processes	P.10	Management System
Positioning of the above processes within the entity's overall risk management	_	_
5. Business model		
The entity's business model	_	_
6. Value chain management		
		Environmental Considerations for Value
Value chain overview	P.18-29	Chain Management
		Reducing Environmental Risk through
Green procurement policy, objectives, and results	P.19	Operation of the Green Accreditation System
		Implementation of Environmentally
	P.18	Conscious Design
Status of eco-friendly products and services)
	P.27-28	Contribution to Reducing CO2 from Product Usage
7. Long-term vision		Froduct Osage
	P.2-3	Environmental Sustainability Vision 2050
Long-term vision	P.2-3	Environmental Sustainability Vision 2050
Time period covered by the long-term vision	P.Z-3	ETIVITOTITTETILAL SUSTAILIADILILY VISIOTI 2050
Reasons why that time period was selected		_
8. Strategy		
business stategy of an entity developed for contributing to the	P.2-3	Environmental Sustainability Vision 2050
Business strategy of an entity developed for contributing to the achievement of a sustainable society	P.2-3	Environmental Sustainability Vision 2050
Methodology fort identifying material environmental issues		,
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues	P.2-3	-
Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues		- -
Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material	_	-
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues	_	- -
Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material	_	- -
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues	_	- - - -
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues		Initiatives to Realize a Decarbonized Society
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues	_	
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues	- - - - - - P.5-6	
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues	P.5-6	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues	P.5-6 P.16-17 P.40	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues	P.5-6 P.16-17 P.40 P.15	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans	P.5-6 P.16-17 P.40 P.15 P.16-17	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans	P.5-6 P.16-17 P.40 P.15	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO ₂ from Production
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators	P.5-6 P.16-17 P.40 P.15 P.16-17	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO ₂ from Production Contribution to Reducing CO ₂ from
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO2 from Production Contribution to Reducing CO2 from Product Usage
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators Methodologies used for calculating each performance indicator	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28 P.23-24	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO2 from Production Contribution to Reducing CO2 from Product Usage Reducing Water Usage
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators Methodologies used for calculating each performance indicator Aggregation scope of data for each performance indicator	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28	Initiatives to Realize a Decarbonized Society Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO ₂ from Production Contribution to Reducing CO ₂ from Product Usage
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues Its of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators Methodologies used for calculating each performance indicator Aggregation scope of data for each performance indicator Financial impact of related risks and opportunities and calculation	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28 P.23-24	Initiatives to Realize a Decarbonized Society, Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO2 from Production Contribution to Reducing CO2 from Product Usage Reducing Water Usage
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues List of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators Methodologies used for calculating each performance indicator Aggregation scope of data for each performance indicator	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28 P.23-24	Initiatives to Realize a Decarbonized Society, Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO2 from Production Contribution to Reducing CO2 from Product Usage Reducing Water Usage
9. Methodology fort identifying material environmental issues Procedure by which the entity identified its material environmental issues Its of identified material environmental issues Reasons that the identified environmental issues were judged material Boundaries of the material environmental issues 10. The entity's material environmental issues Policies and/or action plans Targets and results of policies / action plans based on performance indicators Methodologies used for calculating each performance indicator Aggregation scope of data for each performance indicator Financial impact of related risks and opportunities and calculation	P.5-6 P.16-17 P.40 P.15 P.16-17 P.20-21 P.27-28 P.23-24	Initiatives to Realize a Decarbonized Society. Examples of Initiatives to Realize a Decarbonized Society Environmental Plan 2023 Biodiversity Action Guidelines Overview of the 9th Environmental Plan Environmental Plan 2023 Reducing CO2 from Production Contribution to Reducing CO2 from Product Usage Reducing Water Usage

Item to Be Reported	Reference	Contents
	Page (s)	Contents
Reference: Major environmental issues and their performance indicators		
1. Climate change Greenhouse gas emissions		
Scope 1 emissions	P.36	Reducing Greenhouse Gases Emitted in the Value Chain
Scope 2 emissions	P.36	Reducing Greenhouse Gases Emitted in the Value Chain
Scope 3 emissions	P.36	Reducing Greenhouse Gases Emitted in the Value Chain
Emission intensity		The value Chain
Greenhouse gas emission intensity	_	_
Energy usage		
Breakdown of energy usage and overall energy usage	P.34-35	Material Balance
Renewable energy usage as a percentage of overall energy usage	P.34-35	Material Balance
2. Water resources	_	
	P.23-24	Reducing Water Usage
Water resource inputs	P.34-35	Material Balance
	P.36	Amount of Water Intake/Drainage/Reuse
Water intensity	P.23-24	Reducing Water Usage
vvdeci interiorey	P.36	Amount of Water Intake/Drainage/Reuse
	P.23-24	Reducing Water Usage
Water discharge	P.34-35	Material Balance
	P.36	Amount of Water Intake/Drainage/Reuse
Status of water stress, if the entity has sites or supply chains located in	_	_
areas with water stress 3. Biodiversity		
Impact of business activities on biodiversity	P.30-32	Biodiversity Preservation Activities
		Biodiversity Freservation Activities
Status and extent of the dependency of the entity's business activities on biodiversity	P.30-32	Biodiversity Preservation Activities
Business activities that contribute to biodiversity conservation	P.30-33	Biodiversity Preservation Activities
Status of cooperation with external stakeholders	_	_
4. Resource circulation		
Resource inputs	1	
Volume of nonrenewable resource inputs	_	_
Volume of renewable resource inputs	P.23-24	
Volume of recycled materials used	P.23-24 P.36	Reducing Water Usage Amount of Water Intake/Drainage/Reuse
Polar (constitution of the last of the la	P.23-24	
Rate of recycled and reused resources (= Volume of recycled materials used / Volume of resource inputs)	P.23-24 P.36	Reducing Water Usage Amount of Water Intake/Drainage/Reuse
Resource waste	F.30	Amount of Water Intake/Drainage/Reuse
	P.22	Reducing Final Waste Disposal Ratios
Total production of waste, etc.	P.34-35	Material Balance
	P.22	Reducing Final Waste Disposal Ratios
Total final disposal volume of waste, etc.	P.34-35	Material Balance
5. Chemical substances	1.5 1 55	A deciral balance
Volume of chemical substances in storage	_	_
*	P.25	Managing Chemical Substances
Volume of chemical substance emissions	P.34-35	Material Balance
Volume of chemical substances transferred	P.25	Managing Chemical Substances
	P.34-35	Material Balance
	P.25	Managing Chemical Substances
Volume of chemical substances handled (volume used)	P.34-35	Material Balance
6. Pollution prevention		
General		
Status of legal compliance	P.13	Preventing Environmental Incidents
Air quality conservation		
Air-pollutant emissions volume, emission concentration in air pollution regulations	P.34-35	Material Balance
Water pollution	1	
Water pollution load, emission concentration in emissions regulations	P.34-35	Material Balance
Soil pollution		
Status of soil pollution	P.13	Preventing Environmental Incidents
Land 1975
